Education

Toronto Metropolitan University (Formerly Ryerson University)

Sep. 2020 – May 2025

Bachelor of Science in Computer Science, Minor in Psychology

Toronto, Ontario

Professional Experience

Miix Analytics

September 2025 – Present

Technical Project Analyst

Toronto, Ontario

- Owned and delivered end-to-end MMM studies for Fortune 500 clients, leading data engineering (Python, Pandas), modelling, and data storytelling across the full project lifecycle
- Led client-facing analysis and executive presentations, translating complex model outputs into KPIs dashboards and marketing strategies that guided multi-million dollar marketing decisions
- Acted as primary client lead, managing deliverables, aligning technical outputs with business objectives, and driving project execution end-to-end
- Developed and executed advanced MMM models to evaluate channel performance and ROI, improving predictive reliability by 15%
- Built automated pipelines integrating Nielsen POS, trade, and multi-channel media data, improving data integrity by 25% and enabling scalable modelling workflows

HotTakes

February 2025 – May 2025

UX/Data Analyst

Toronto, Ontario

- Analyzed user behaviour with PostgreSQL to uncover trends, leading to strategic changes that boosted engagement and retention by 15%
- Built dashboards using Metabase and Mixpanel, improving data access and speeding decision-making by 30%
- Resolved 95% of user issues within 24 hours using Firebase, GitHub, and cross-team coordination to improve overall platform satisfaction and user experience
- Performed A/B tests daily to evaluate features on current and new builds of the platform
- Automated support and reporting workflows using Zapier and SQL to cut manual work by 40%

TheScore

September 2022 – May 2023

Quality Assurance Analyst Intern

Toronto, Ontario

- Executed 3,000+ tests across Android, iOS, and Web to validate theScore Bet features and platform functionality, reducing regression testing time by 20%
- Developed automation scripts in Selenium to improve test execution practices, increasing test coverage by 30% and reducing manual QA time by 40%
- Owned TestRail suites and led coordination with fellow QAs and developers for major features (Move The Line, Parlay+), ensuring full test coverage, and smooth release cycles
- Collaborated across QA, dev, and product teams to launch major features, improving deployment quality and minimizing post-release issues

SKILLS & CERTIFICATIONS

Certifications: IBM Data Science Professional

Programming Languages: Python, Java, Rust, JavaScript, SQL (PostgreSQL), HTML/CSS, Go, PHP

Technologies/Frameworks: FastAPI, React, Node.js, Bootstrap, Linux/Unix, NumPy, Pandas, PyTorch, TensorFlow, scikit-learn, SciPy, Matplotlib, Seaborn

Cloud Platforms: AWS, Google Cloud Platform

Developer Tools: Git/Github, Docker, MongoDB, Excel, Oracle, Hadoop, Google Analytics, Testrail, Atlassian Suite (Jira/Confluence), Jupyter, Metabase, Amplitude, Google Data Studio

Projects

Envision: AI-Driven Accessibility Platform | *Python, OpenAI, PyTorch, Pillow, SciPy, Pandas, LLM DETR ResNet-50*

- Collaborated with colleagues to develop a real-time AI-powered tool for visually impaired users, combining object detection and large language models to provide environment descriptions
- Coordinated the implementation of the object detection pipeline using PyTorch and Facebook's Transformer - Hugging Face, achieving over 90% accuracy in live video recognition, providing vivid descriptions for enhanced awareness

FRED: Fraudulent Retrieval & Event Detection | *Machine Learning, AWS EC2 & Lambda, Docker, FastAPI, SageMaker*

- Built a real-time fraud detection API (FastAPI, Docker) powered by an XGBoost model with 90% fraud precision, using AWS Lambda, EC2, and SageMaker for scalable serverless inference, and automated the ML pipeline with DynamoDB and GitHub Actions for continuous training, testing, and deployment.
