(647)-234-2470 | choyonuddin17@gmail.com | [LinkedIn](#) | [GitHub](#) | Pickering, ON

EDUCATION

Toronto Metropolitan University (Formerly Ryerson University)

September 2020 - April 2025

- **Bachelor of Science in Computer Science, Minor in Psychology**
- Metropolitan Data Science Association (MDSA) Associate, Computer Science Union (CSU) Associate

WORK & LEADERSHIP EXPERIENCE

Technical Project Analyst

Toronto, Canada

Miix Analytics

September 2025 - Present

- Processed and harmonized marketing, trade, and base data for Fortune 500 clients using Python (Pandas, Numpy), Excel, and Attribution Engine, improving model quality and marketing ROI analysis accuracy by 25%.
- Conducted advanced mix-marketing models to evaluate channel effectiveness and ROI, boosting predictive reliability by 15%.
- Created data storytelling decks and KPI dashboards for executives, translating complex results into clear insights and well-informed decision-making.
- Delivered data-driven findings in executive meetings, optimizing multi-million-dollar marketing budget allocations and marketing strategies, contributing to improvements in marketing ROI.

UX/Data Analyst

Toronto, Canada

HotTakes

February 2025 - May 2025

- Analyzed user behaviour (PostgreSQL) to drive strategic changes, boosting engagement and retention by 15%.
- Built Metabase and Mixpanel dashboards, improving data access and decision-making speed by 30%.
- Resolved 95% of user issues within 24 hours using Firebase and GitHub, enhancing platform satisfaction.
- Performed daily A/B tests to evaluate features and inform release decisions.
- Automated support and reporting workflows with Zapier and SQL, reducing manual work by 40%.

Quality Assurance Analyst Intern

Toronto, Canada

theScore

September 2022 – May 2023

- Executed 3,000+ tests across Android, iOS, and Web to validate theScore Bet features and platform functionality, reducing regression testing time by 20%.
- Created automation scripts (Selenium), improving test coverage, and reducing manual QA testing time by 40%.
- Owned TestRail suites and collaborated across QA, dev, and product teams to launch major features (Move The Line, Parlay+), ensuring full test coverage and smooth release cycles.
- Logged and tracked bugs using Jira and Confluence, improving resolution turnaround by 15%.

SKILLS & CERTIFICATIONS

Certifications: [IBM Data Science Professional](#)

Programming Languages: Python, Java, Rust, SQL (PostgreSQL), Go, JavaScript, PHP

Frameworks/Libraries: NumPy, Pandas, PyTorch, TensorFlow, scikit-learn, SciPy, Matplotlib, Seaborn, FastAPI, React, Node.js, Bootstrap, Selenium, Playwright

Cloud Platforms: AWS, Google Cloud Platform (GCP)

Developer Tools: Git/Github, Docker, MongoDB, Oracle, Hadoop, Linux/Unix, Google Analytics, Testrail, Atlassian Suite (Jira/Confluence), Jupyter, Metabase, Amplitude, Excel

PROJECTS

Envision: AI-Driven Accessibility Platform | *Python, OpenAI, PyTorch, Pillow, SciPy, Pandas, LLM DETR ResNet-50*

- Developed a real-time AI tool for visually impaired users with colleagues, integrating object detection and LLMs; implemented PyTorch + OpenAI pipeline, achieving 90%+ accuracy in live video recognition with vivid environment descriptions.

FRED: Fraudulent Retrieval & Event Detection | *AWS EC2 & Lambda, Docker, FastAPI, SageMaker*

- Built a real-time fraud detection API (FastAPI, Docker) powered by an XGBoost model with 90% fraud precision, using AWS Lambda, EC2, and SageMaker for scalable serverless inference, and automated the ML pipeline with DynamoDB and GitHub Actions for continuous training, testing, and deployment.
